DIMS
DIMS INTERVIEW MANAGEMENT SYSTEM
## *Overview*

LINEAR SYSTEMS

The **DIMS** Interview Management System is a powerful and user-friendly digital video recording system specifically designed for Law Enforcement. The electronic and video recording of investigative interviews is a powerful and efficient Law Enforcement tool by ensuring a factual presentation of evidence. The **DIMS** Interview Management System delivers a combination of advanced digital audio and video technology with comprehensive case management software, providing powerful video monitoring, recording, archiving, viewing/ distribution options, and case management tools for Law Enforcement agencies.

Hardware Features

POWERFUL AND SECURE

⇒ Linear provides **DIMS** stations and software, with or without cameras and microphones.

⇒ 1-6 rooms per **DIMS** Station with 1-3 cameras per room.

⇒ **DIMS** system supports digital or analog cameras; covert or overt, fixed or PTZ (includes embedded PTZ control).

⇒ Options for HDTV, Megapixel, or CCTV with H.264 compression and MJPG, MP4, AVI stream.

⇒ **DIMS** system includes **Mirrored RAID 1+0** drives to maintain data redundancy through the whole acquisition, storage, and archive process.

CONVENIENT

⇒ Retrofit to existing wiring and components.

⇒ System is easy to operate with the simple click of one button; virtually no training required.

⇒ Optimized for high quality audio and video recordings utilizing security and redundancy.

⇒ Access a live feed remotely for observation.

⇒ Online review from **any** computer on the Agency's Intranet using **DIMS** web browser based on permissions.

⇒ Capability to bookmark, clip, and annotate points of interest.

⇒ Advanced multi-tasking capability allows recording and burning information/evidence to CD/DVD/Blu-ray disc.

Cost Effective

⇒ **FREE** version upgrades!

⇒ **FREE** software support!

⇒ **UNLIMITED** users with **NO** client licensing fees!

⇒ **DIMS** saves time and money throughout the investigation process.

Direct Integration with DIMS

Covert Microphone

PTZ Camera

Covert Wall Camera

DIMS (Digital Information Management System) has proven to significantly increase conviction rates. **DIMS** solutions can acquire and manage the authentication of entire interview videos, audio recordings, and clips of video, along with notes and still photos to ensure a complete Chain of Custody.

A **DIMS** Interview Management System ensures the complete implementation and enforcement of an Agency's Policy and Procedures, optimizes communication, increases efficiency, reduces liability, ensures the authenticity of evidence, all while eliminating challenges to an Agency's credibility.

Software Features

AUDIO

⇒ Recording format offered in a stereo or a mono version.

⇒ Audio tracks sampled at 16 kHz sampling rate with 16 bits per sample offered.

⇒ Separate audio channel saved from recorded audio and video for easy and secure transcription.

⇒ Audio levels indicator and visual notification of no data.

VIDEO

⇒ Picture-In-Picture or side by side with no loss of data from overlay and/or time code.

⇒ Settings capture 2 camera angles per room with the ability to swap camera views during recording.

⇒ Real-time viewing of interviews on ImageServer Viewer.

⇒ Resolution settings from 640 x 480 to 1080p for analog or digital cameras.

RECORDING

⇒ Initiate recording by simply clicking the record button.

⇒ Records 30 frames per second.

⇒ Records 6 interview rooms simultaneously.

⇒ System stores up to 8000 hours of video locally and automatically transports to **DIMS ImageServer.**

⇒ Administrator options to choose codecs for acquisition, storage, and output of video and audio.

⇒ Ability to classify recording to control access and to determine when to delete (determined by Statute)

MEDIA EXPORTING

⇒ Consistent name, date, time, room number and camera title stamped on all exported media.

⇒ Automatically exports videos to **DIMS ImageServer.**

⇒ Export user-defined clips or entire session to DVD, allowing up to 8 hours recording per DVD.

⇒ Burn a 1 hour interview to DVD disc in less than 6 minutes.

⇒ Still images: ability to export individual frames with notes for review (JPEG and BMP formats).
